Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit:

Claims 12-18 and 41-47 have been cancelled. The active claims are 1-11 and 19-40.

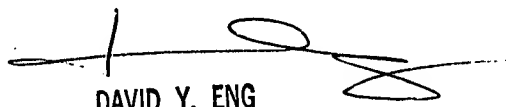

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 and 19-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adiletta.

With respect to claims 1, 19 and 30, see at least the abstract and column 2, lines 45 et seq. of Adiletta. Adiletta teaches a prior art CODEC between a transmission line and a storage. The speed of compression and decompression by the CODEC is such that it compensate the speed difference between higher transmission rate and slower storage rate. Adiletta does not make clear that CODEC is controlled by an instruction program. One of ordinary skill in the art should readily recognize that digital circuits, including CODEC, are controlled by program instructions. The storage medium in Adiletta for storing the CODEC control program is machine readable also.

As to the dependent claims, one of ordinary skill in the art should readily recognize that the speed of the CODEC is selected or adjusted such that the transmission rate and the storage rate are compatible because otherwise information will be lost.
